

## Review Form 1.6

Journal Name:	<a href="#">Journal of Pharmaceutical Research International</a>
Manuscript Number:	Ms_JPRI_79808
Title of the Manuscript:	A STUDY OF SEROLOGICAL ASSAY OF ANTIGEN RECOGNIZED BY CAMA3C8 IN PATIENTS WITH CARCINOMA OF THE BREAST
Type of the Article	

### **General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljpri.com/index.php/JPRI/editorial-policy>)

### **PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>The reviewed manuscript has been written concisely, and it certainly explains the biochemical aspects and clinical correlation for the molecule CAMA3C8 and clinical stage, different malignant diseases, and histologic characteristics of various malignant diseases. However, the authors have some significant issues to solve in presenting the results.</p> <p>The tables are made in an unusual form. Usually, the studied groups are presented as columns and the variables as rows.</p> <p>The authors present the variables in columns and the studied group in rows.</p> <p>The statistical description is insufficient, practically absent in the abstract and the material and methods section in the main text. The authors describe the median but not the interquartile intervals as dispersion measures. They do not describe any p-value for parametrical or no-parametrical variables (tables 1 and 2. The reviewer suggests a specific way to present results in the tables, in the main text document in the Tables section).</p> <p>In the lowest row of Table 3, the authors wrote in the column entitled Immunoassay: Ca of uterine cervix. The sentence is confusing because other rows describe cell-line names.</p>	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments		

**Review Form 1.6**

**PART 2:**

	<b>Reviewer's comment</b>	<b>Author's comment</b> <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
