PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Title is not appropriate. The article seems to be scientifically weak. More technical details need to be added to make it a concrete research work. The biochemical evaluation of beet root extract needs to be done to prove that what properties of the extract makes it worth to be used in lip balm. The product should further be tested on experimental models as well before giving it to be choice to be used on human subjects. The paper lacks a scientific approach and just seems to be a home remedy solution. More biochemical evaluations ie estimation of secondary metabolites, estimation of lipid content needs to be done. In addition Rancidity (Peroxide Number) Breaking load test Particle size of undispersed pigments Microbiological examination Softening point also needs to be evaluated.	
Minor REVISION comments		
Optional/General comments	A major revision is required before acceptance
