### **PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	This review is an interesting study of retinal detachment after cataract surgery in high Myopics. In my opinion the authors should explain about the types of cataract surgery: extracapsular and intracapsular cataract extraction in some more lines. They should also write detailed description in the paragraph " Retinal detachment after cataract surgery "Overall this review is a good effort by the authors which has its own novelty.	
<b>Optional/General</b> comments		

### **PART 2:**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	(If yes, Kindly please write down the ethical issues here in details)
