PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Authors should do an EXTENSIVE review of the English language. Unfortunately, in this condition, this review is not publishable at all; in addition, the manuscript is plenty of punctuation errors. Abbreviations should be explained (e.g. HE). The paragraph about the pathogenesis is too simplistic, not at a review level. Furthermore, the authors should provide a correlation between the therapy and pathogenesis. To conclude, I have never seen a review with so few references.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
