Manuscript Number:	Ms_JPRI_80019
Title of the Manuscript:	Comparative evaluation of remineralization potential of acidulated phosphate fluoride and hydroxyapatite nanoparticles with and without iontophoresis on the incipient carious lesion in permanent teeth.
Type of the Article	Study Protocol

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljpri.com/index.php/JPRI/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	What is the basis for your expected results? How about ethical approval for this study? You need to correct some typo grammatical errors	
Minor REVISION comments		
Optional/General comments	Being a topic in the area of dental treatment. I advise the journal to seek Technical comments from a dentist regarding the materials examined in this protocol. I put my opinion on the study design and methodology of this protocol. It needs further improvement. especially, regarding ethical approval and data collection	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
