

Review Form 1.6

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_80049
Title of the Manuscript:	Effect of radiotherapy on microhardness and surface morphology of pretreated primary teeth with silver diamine fluoride: An in vitro study
Type of the Article	Study Protocol

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The application of silver diamine fluoride discolours the tooth surface. For example, black, brown, etc. What do you think about clinical aesthetic disorders? Describe the basis for radiation of 10 Gy per day for 6 days.	
Minor REVISION comments	SDF is affected by structural changes in teeth caused by dentin matrix proteins and reducing substances in saliva. I think there is a need for additional consideration.	
Optional/General comments	This case is a very interesting paper. But it needs to be added and modified.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
