### **General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalpri.com/index.php/JPRI/editorial-policy>)

### **PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	it is an excellent study from which very valuable information can be obtained. I have some recommendations, 1.-In the part of the design it should be specified what type of study is whether it is qualitative or quantitative and subdivide it if it is descriptive, prospective, retrospective, experimental ... from what I observe seems quantitative but could have a qualitative approach for the objective. 2.- regarding the questionnaire to be used, it must be a questionnaire that has already been validated or validated to use it 3.- it is very important to include the bioethics part in all the protocols that are carried out specifying the risks and benefits of the participants and researchers in such a way that there is no bioethical conflict in the protocol.	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments		

### **PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i> Yes, of course, working with human beings must have prior informed consent on the protection of personal data in addition to respecting the bioethical principles of those involved during the research.
