### **PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>The topic is a very good and relevant topic, that will add to the body of literature. However, I have a few concerns-</p> <ol style="list-style-type: none"> <li>1. An abstract should contain a background/introduction, methods, results and conclusion.</li> <li>2. The methodology is written in a proposal format, which means the study has not been carried out, kindly explain. What will be use for analysis and how it will be presented</li> <li>3. No results</li> <li>4. The discussion was more of literature review, it is supposed to discuss your results. No conclusion</li> <li>5. The referencing of the discussion is completely different from the others. You should stick to a particular pattern</li> <li>6. Your reference nos. 8-15 were not properly discussed</li> </ol>	
<b>Minor</b> REVISION comments	<p>Keywords should be changed to depict the essence of the study, review the introduction as the 1<sup>st</sup> 5 lines are a replica of the abstract. "fissure soles" should be replaced with "fissures of the soles" Reference of 1999 is old</p>	
<b>Optional/General</b> comments	<p>There are some typographical and gramatical errors</p>
