Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>1-Abstract: keywords should be written in full words.</p> <p>2-Introduction: It is clear and concise. The aim of the study should be added to the last paragraph. In addition, the objectives should be removed as you mentioned the assessment methods and you already mentioned it in the procedures.</p> <p>3-Methodology: -Why did you take only one group? It is better to compare the results of MFR of suprahyoid muscle with other group taking other treatment as medications. -Is one week enough for treatment of swallowing? -It is better to add the procedure of MFR of suprahyoid muscle in details. Also, the assessment methods (Sydney swallowing questionnaire (SSQ-17), LDF-TMD questionnaire, maximal interincisal opening (IIO) and pain pressure threshold (PPT) should be explained in more details.</p> <p>4-Results: The data mentioned in table 1 is duplicated in table 2 so remove it from table 1 and write only the patient demographic data. -Where are the data for pain pressure threshold?</p> <p>5-References: You should check the arrangement of references in the whole paper. In addition, I suggest to use only one reference style.</p>	
Minor REVISION comments	<p>- The abbreviations (MFR and TMD) should be mentioned in full words in the abstract as it is the first time mentioned in the text.</p> <p>-The abbreviations in Table 1 &2 should be written in full words under the table.</p>	
Optional/General comments	I appreciate your great work.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
