

## Review Form 1.6

Journal Name:	<a href="#">Journal of Pharmaceutical Research International</a>
Manuscript Number:	Ms_JPRI_80117
Title of the Manuscript:	SHORT-TERM EFFECT OF MIRROR THERAPY AND MOBILIZATION IN ADHESIVE CAPSULITIS: A RANDOMIZED CONTROLLED TRIAL
Type of the Article	Original Research Article

### **General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

**Review Form 1.6**

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p><b>Title:</b> Revise title Effect of short term mirror therapy and maitland mobilization in adhesive capsulitis: a randomized <b>clinical</b> trial.</p> <p><b>Revise objective:</b> In accordance to title revise objective. Remember your title and objective are same. (To compare Effect of short term mirror therapy and maitland mobilization in adhesive capsulitis stage 1 and 2 patients: a randomized clinical trial.)</p> <p><b>Introduction:</b></p> <ul style="list-style-type: none"> <li>• Introduction should be in paragraphs. one and half line paragraph is not considered it should be atleast 3-4 lines in a paragraph. Bullets are not acceptable in introduction. So write introduction in correct format.</li> <li>• Revise rationale, it's the objective which is written. (Rationale is what will be your research contribution / why you are interested to do)</li> </ul> <p><b>In methodology;</b></p> <ul style="list-style-type: none"> <li>• Your study design is Randomized clinical trial and not Randomized controlled trial. As two different intervention given to two different groups so both group received intervention, so Randomized clinical trial (RCT).</li> <li>• Sampling technique not mentioned.</li> <li>• How sample size calculated not mentioned.</li> </ul> <p><b>References:</b></p> <ul style="list-style-type: none"> <li>• References are not added by endnote software.</li> <li>• References of 1983 &amp; 1984 not acceptable, maximum references should be 5 years old only acceptable with some beyond it but 1983-84 not acceptable.</li> </ul> <p><b>(Comment for Author:</b> Maitland Mobilization Grade 1 and 2 is used for only for pain control and don't have effect on ROM we know that, and in mirror therapy you actively perform ROM in front of mirror so improvement you saw.) As literature says Maitland grade 3 is effective for rom improvement. Next time when doing research always consider techniques which are used for same purpose and whose effect is better; determine that. You always need to explain its grade 1 and 2 used that's why mirror therapy group have good results.)</p>	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments
