Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>1. In the abstract, it is necessary to expand the topic of complications of cataract operations, in accordance with the title of the article. The author does not write about this at all. <u>The abstract section needs to be reworked</u></p> <p>2. <u>Add the word "complications" to the keywords</u></p> <p>3. The introduction says little about cataract surgery and the complications of these procedures. <u>It is necessary to revise and strengthen this section.</u></p> <p>4. In the section on cataract treatment by surgery, the list of operations does not indicate phacoemulsification of cataract. But a femtosecond laser is indicated. In the future, the author writes a section on phacoemulsification, but there is no section on femtosecond laser for cataract removal. <u>This section needs to be revised</u></p> <p>5. The sections are written inconsistently: First the section "types of cataract surgery", then the section "Types of cataracts", then the section "pathophysiology of cataracts" then the section "complications of cataract surgery" <u>It is necessary to swap the sections: first "types of cataracts", then "pathophysiology of cataracts", then "types of cataract operations" with a description of the complications of each type of operation.</u></p> <p>6. In the list of references, items 13-17 are not relevant to the topic of this article. <u>They need to be removed and this section should be finalized.</u></p>	
Minor REVISION comments		
Optional/General comments	The article must be revised and re-submitted for review, or the title must be changed to "What is cataract and methods of its treatment"	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
