PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none"> 1. Place of study in detail was not mentioned. 2. Mention the duration after which the patient developed the disease symptoms rather than motioning "a couple of days after vaccination". Mention the date of hospitalization. 3. Is it the first dose or second dose? If first or second dose supportive document of vaccination is present or not? 4. Other health complication of the patient, like cardiovascular and respiratory, before vaccination can be explained clearly so that it can confirm that these symptoms were only after vaccination as the patient is suffering from psychiatric illness. 5. Did vaccination resulted in urinary tract infection by drug resistant klebsiella species ? 6. Clearly mention the type of GBS. Elaborate on diagnostic parameters. 	
Minor REVISION comments	<ol style="list-style-type: none"> 1. Representation of COVID 19 is not uniform throughout the article. 2. check the line spacing like (isreferred, fluidanalysis etc) 	
Optional/General comments	Study on post vaccination complications is appreciated. With the mentioned revisions it will be effective publication.
