PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none">1. Give reason for choosing particular age group of 8-13 years.2. Is there any explanation for choosing rural children only? In methodology there is no any criterion set to choose rural children.3. This study totally depends on the foot print of the subjects so getting correct foot print without any technical error is the most. When an individual stand in one foot there might be unintended body wobbling that may alter the normal foot print pattern so explanation to avoid such error is necessary.4. Sample size calculation part should be clear.	
Minor REVISION comments	<ol style="list-style-type: none">1. Grammatical errors should be corrected.2.	
Optional/General comments	<ol style="list-style-type: none">1. Most of the patient visiting orthopaedic OPD might have limb injury so instead of hospital if the author can include school children as subject will be possible get sample size in short duration.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
