PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This is an interesting and concise review paper regarding the resurgence of COVID-19. The topics covered the topic in a concise way, and the comparison made with the Spanish flu pandemic that occurred in the 20th century was helpful to understand the subject. I strongly suggest updating the topic with more information regarding the third wave and the role of other Variants of Concerns.	
Minor REVISION comments	I suggest a revision of the English in the manuscript for a better understanding of the text and correction of some errors in the writing.	
Optional/General comments	Others aspects that could be more detailed are the efficacy of non-pharmaceutical interventions and the data about the difference of the mean of reproduction number between the waves. It's necessary that the topic regarding "Mutation in novel Coronavirus" provide more information regarding the variants of concern, as this topic is currently one of the most relevant in the aspect of occurrence of new waves of covid-19.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
