**Review Form 1.6**

**PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b><u>Compulsory</u></b> REVISION comments	<p>I read through the manuscript; I would recommend major revisions before further reviewing the article. The authors should structure the manuscript according to the guidelines of the journal plus the following</p> <p>(1) the title could be rephrased to indicate the area and country (its much better for international audience to understand, so NCR could be written in full and add country)</p> <p>(2)input authors' details including names and affiliations</p> <p>(3) change spacing to be double spaced</p> <p>(4) insert numbers on the right side margin for referencing during reviewing (click layout&gt;&gt;&gt;line numbers&gt;&gt;&gt;continuous)</p> <p>(5) Edit any grammar, typos and punctuations</p> <p>(6) Appropriate headlines for the methods and methodology section (e.g. study area, sampling technique, Bacterial identification and antimicrobial susceptibility testing, DNA extraction, Statistical analysis (include tools used), ethical approval (Board and ethical approval number) and etc</p> <p>(7) Add study area section and a figure showing the sampling area</p> <p>(8) Remove table 6 from discussion and refer the information</p> <p>(9) Discuss the results</p> <p>(10) Use same style of referencing</p>	
<b><u>Minor</u></b> REVISION comments		
<b><u>Optional/General</u></b> comments	<p>Overall, its great work and gives important information on the prevalence of MRSA and drug susceptibility of Staph aureus in NCR region.</p>
