PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1. Level of evidence is not high. 2. Robust search of literature has not been done. Only 4 studies has been included, which shows a lack of effort.	
Minor REVISION comments	1. The script need to be amended with inclusion of relevant details only. Vague comments and description should be avoided. 2. The table is not self explanatory and missing important details about the studies included.	
Optional/General comments	The article is merely a review of literature . The NLF is a routinely used flap and the study should highlight its versatility instead of propagating it as a choice of flap for poor patient. Using it instead of free flap is a constraint and not an indication.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
