PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The work done by the author is good. Formulation of sustained release formulations was a good idea. However there are some compulsory revision comments.</p> <ol style="list-style-type: none">1. Lot of grammatical errors were there. Please rectify them.2. Sentence formation is not at all good. Rewrite the sentences in a grammatical manner.3. Many abbreviations are placed in the article without their full forms.4. Calibration curve was performed in phosphate buffer pH 7.4. but drug content was performed in 0.1N hydrochloric acid. Justify.5. Some of the references were out of format. Rectify.6. The discussion section should be corrected totally. There is no discussion of the obtained results with mechanisms. Include past study references and correlate them with the results obtained.	
Minor REVISION comments	<ol style="list-style-type: none">1. Provide clear DSC image	
Optional/General comments		

Review Form 1.6

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
