PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1-I am glad that the author choose this important subject in which many researchers search regarding vitamin D in relation to PCOS. 2-Regarding the inclusion criteria , you choose known case of PCOS for 1 year , while we all Know that PCOS may be genetic & the patient may not have the knowledge regarding having this syndrome . 3-Regarding the exclusion criteria, there are other disorders which should be excluded including DM, HT and morbid obesity. 4-In Discussion, you nicely explain the strong relation of vitamin D with BMI, but in spite that you didn't include it in your exclusion criteria. 5-In References, all of it of more or equal to 10 years, while the subject you choose have many new updated researches.	
Minor REVISION comments	In the Title & Abstract, you wrote that your study is a case control while your Methodology is a cross sectional study.	
Optional/General comments
