

Review Form 1.6

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_80422
Title of the Manuscript:	Tongue Reconstruction by Nasolabial flap
Type of the Article	Review Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

<https://www.journaljpri.com/index.php/JPRI/editorial-policy>

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	I suggest the authors to consult and follow the PRISMA guidelines for review article to deeply understand what a review article is. Anyway, even if the manuscript pretended to make a revision of their own experience solely, it is badly structured and not precise in the description: i.e. what is the time period of the study? What is the follow up of patients? If authors wanted to make a retrospective study of their experience I suggest them to follow the classic structure for the scientific article: Introduction, Methods and Materials, Results, Discussion. Please, structure your study in scientific manner: let's have a look to STROBE guidelines for observational studies.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
