### **General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljpri.com/index.php/JPRI/editorial-policy>)

### **PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<ol style="list-style-type: none"> <li>1. The discussion is too superficial. I suggest a discussion of the dangers of preeclampsia to kidney damage that remains the only detail.</li> <li>2. Many writings are still wrong, the use of hyphens, the term renal should be changed to kidney, the writing of numbers should be written in letters if it is still a single digit.</li> <li>3. Need a more complete description of the solitary kidney, is it part of the congenital anomaly of the kidney and urinary tract (CAKUT)? if it is classified as 'caut', then it is likely that hypertension is due to CKD. If it is classified as CKD, then GFR data is needed through nuclear medicine examination.</li> <li>4. Anthropometry and urinalysis data need to be completed, to determine the presence of short stature due to CKD. History taking about the previous general check up is very necessary</li> <li>5. This manuscript still needs many revisions, in order to provide adequate information to readers and have an impact on health services</li> </ol>	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments	Need major revision
