PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>There isn't any information about other expectorants in Al kharj market. The article has studied all of the prescriptions included Guaiafenesin. I think they should repeat their study in another period, collect the number of all orders and register the amount of all different expectorants. Then by statistics they can find the most common expectorant syrups. By the method that they have done the only counted syrup is guaiafenesin, how can you prove that it is the most common. On the other hand, in that city, guaiafenesin is over the counter. So , many of patients can buy the medicine without referring to doctor and without prescription.</p>	
Minor REVISION comments	How they studied the duration of use of syrup?	
Optional/General comments	Table 1 Age: less than 10 is better to change to 4-10 Because use of this drug is not allowed less than 4 years	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
