PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>This manuscript is to determine an association between inflammatory and coagulation markers in a COVID-19 patient with ischemic stroke. From my point of view, it is a topic of interest to researchers in the related areas. However, I have some comments.</p> <ol style="list-style-type: none">1. In methodology, database search time is from 2010 to 2021, and the included literature was published in 2005 and 2017. But the new Coronavirus was discovered at the end of 2019. I found that it was very puzzling. Based on the above literature, the conclusion of this paper is unreliable.2. This manuscript included some randomized controlled trials. Why did the data processing have no control group data, but only compared with the normal value?3. This manuscript is to determine an association between inflammatory and coagulation markers in a COVID-19 patient with ischemic stroke. But how to exclude the relationship between inflammatory and coagulation markers in stroke patients, the author did not discuss it.4. COVID-19 patients include nonsevere and severe patients. There are differences in inflammatory and coagulation markers between them. The author did not discuss it.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
