### **PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>Grammar and formatting errors are prevalent throughout the manuscript. I will include an edited draft, but further editing will be necessary.</p> <p>UV figures indicate six samples were measured, yet only four are listed in the table. A better description of the measurements and samples is needed.</p> <p>How do the authors know that there is a linear correlation between the UV spectra and concentration since the solutions are not identical. Since different additives are employed, what is the confidence in the linearity of the absorption vs concentration. In other words, if the same concentration was measured in different solutions, are the absorptions all equivalent?</p>	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments		

### **PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
