PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Some important information is not shown, such as:</p> <ol style="list-style-type: none"> 1. According to the text, I am not sure the sample of 50 participants is enough. Is the formula appropriate in this study? If yes, what is z, q, d? 2. Why does this study exclude older than 50 years, but not older than 65 years? 3. Why does this study exclude patients with metabolic disorders, CVA, CAD, but not with diabetes? Besides, this study does not show the criteria of hyperlipidaemia, and the criteria of hyperlipidaemia between diabetes patients and non-diabetes patients is different. 4. Does this study exclude patients with family hyperlipidaemia? It seems like to focus on the change of lifestyle. 5. What does the lipid profile include? 6. The statistical analysis does not include correlation. Therefore, the expected results may also not include positive correlation. <p>The content about the previous studies is similar as they are in the original articles.</p>	
Minor REVISION comments	Please modify the reference style. There are various reference styles.	
Optional/General comments	Please provide more reference about the previous studies for the association between hyperlipidaemia and migraine.
