

## Review Form 1.6

Journal Name:	<a href="#">Journal of Pharmaceutical Research International</a>
Manuscript Number:	Ms_JPRI_80775
Title of the Manuscript:	A Study of Clinical Profile and Management of Allergic Conjunctivitis in Rural Tertiary Care Centre
Type of the Article	Original Research Article

### **General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

<https://www.journaljpri.com/index.php/JPRI/editorial-policy>

### **PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	<p>My suggestions are a proofreading in the text of some punctuation and spelling errors of some words. It is mentioned in the text that the study will take place from 2020 to 2022, perhaps revising these dates, as all the work is focused on procedures to be carried out in the future, because if it has already started, the ethics committee approval data will be required.</p> <p>Regarding the statistical analysis, a better description of the sample is needed, whether there will be one or more groups; which software is used and which parameters will be evaluated; Will the sample normality test be performed? because only after this result is it possible to properly choose the statistical test. Student's t test is used for two groups or to assess pre and post intervention, thus reinforcing the question whether there will be more than one group. In general, the theoretical framework is well-founded and the research will add excellent results for clinical practice.</p>	
<b>Optional/General</b> comments
