Compulsory REVISION comments	Provide more references that sustain the fact The olfactory tract is underdeveloped Provide more references regarding injury, age, concomitant diseases, Drug induced, Olfactory bulb volume, Intranasal trigeminal nerve, Emotional/pyscological, Steroids, Only one reference is not enough to sustain what you present. Renumber: after 4. Age , follows 6. Concomitant disease – is there something missing or is just a mistake regarding the numbering. From my point of view, WEBMD is not considered a proper reference for an international paper, indexed in clarivate analytics. Please reconsider.
