PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Authors described a study on quantitative analysis of gross morphology of placenta in normal and hypertensive patients. Although the paper is potentially interesting, major revision are needed to improve the results showed in the text. In the discussions the authors repeat the data presented in the results without making an in-depth interpretation of these data and without making them understand their meaning. Moreover, while in the materials and methods they describe the histological stains, images of sections of the placenta are not presented.	
Minor REVISION comments	English needs to be improved	
Optional/General comments
