PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments		
Optional/General comments	<p>Interesting study.</p> <p>Comments;</p> <ul style="list-style-type: none"> - This is a proposal for a descriptive study only. - Multiple regression in such a small number of patients (n=78)?? - Nearly all COVID-19 complications are due to respiratory failure, coagulopathy and cytokine storm. Therefore RV function is secondary and not a primary predictor of mortality. - It is already known from other diseases that patients with cardiac injury have a higher mortality compared to non-cardiac patients. <p>Methodology:</p> <ul style="list-style-type: none"> - PCR positive as inclusion is advisable (discussion afterwards!!) - Why not all the hospitalized patients or all ICU specifically, included? Some deteriorate while hospitalized.
