PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Samir Rafla comment Very strange paper writing No tables, no graphs How you proved that those have heart disease and those do not have heart disease, ECG is mandatory in such research, history taking is never enough. Incidence of diabetes hypertension, level of lipids, renal function, and angina severity class I, II, III, IV. They say heart or peripheral vessel disease, there must be indication of which is which. Body weight, smoking, I need to see photo of calcification and photo without Where are the results? It looks as if this is the protocol not the paper Very elementary way of writing paper.</p> <p>Few corrections by grammar program marked yellow, not all marked</p>	
Minor REVISION comments		
Optional/General comments	<p>Samir Rafla comment Very strange paper writing No tables, no graphs How you proved that those have heart disease and those do not have heart disease, ECG is mandatory in such research, history taking is never enough. Incidence of diabetes hypertension, level of lipids, renal function, and angina severity class I, II, III, IV. They say heart or peripheral vessel disease, there must be indication of which is which. Body weight, smoking, I need to see photo of calcification and photo without Where are the results? It looks as if this is the protocol not the paper Very elementary way of writing paper. Discussion did not show comparison with other publications by details.</p>
