PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The manuscript is aimed to Assess the Compliance Level of Healthcare Personnel at AVBRH to Appropriate Hand Hygiene Practices.</p> <p>There is several issues for consideration:</p> <ol style="list-style-type: none"> 1. Lots of grammatical mistakes are present in the manuscript. 2. There is no consistency in the whole manuscript. In one section the authors emphasized infectious diseases in general while in the middle part of the manuscript they started to description COVID-19 and the importance of handwashing in pandemic conditions. 3. In some parts the authors tried to show that handwashing is preventive for all kinds of infections including Covid-19 but as we know the airborne infections need other preventive procedures along with hand wash. 4. In the manuscript we read lots of repetitive sentences with minimum difference between them and I think the authors can summarize the manuscript in 2 pages. I put my comments in the main manuscript and revise the language but many changes are needed. 	
Minor REVISION comments		
Optional/General comments
