### **PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<b>Kindly see objective evaluation part. Thank you.</b>	
<b>Minor</b> REVISION comments	<p>I can't tell whether the psychology affects Covid or the other way around just by looking at the title. The title does not make it clear what the review is about or what it is referring to (main subject). Revise the title I suggest to make it more specific and concise.</p> <p>The presentation is poor because it is not properly formatted; words and phrases are not clearly connected, making it difficult to read. The use of abbreviations and their meaning varies by section, for example, PTSD. As far as I'm aware, PTSD stands for post-traumatic stress disorder, according to the medical dictionary, so how come it has a different meaning in this paper? Please clarify this.</p> <p>The abstract does not clearly define the review questions, the subject focus and conclusions attained from the review activity.</p> <p>This review's contradictions and gaps are not well established in the introduction. Because the main body is missing, I assume it is included in the methodology?</p>	
<b>Optional/General</b> comments		

### **PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
