### **PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory REVISION</b> comments As a review paper this manuscript provides basic concepts in the management of patients with Covid19. Many statements however, are not supported with solid data, presumably because such information does not exist yet. As such a more cautionary statement should be made particularly as it relates to immunity. In addition, the last paragraph: "Mothers who contract Covid-19 should be well taken care of to avoid any serious complications to the mother or the child. While no proof show that monoclonal antibodies are safe to use during pregnancy, other immunoglobulin G preparation have now been used securely throughout this time. pregnant women should not avoid these things as a result." Author needs to provide a reliable and referenced indication, if information exists as it is likely to inform caregivers as it relates to management.		
<b>Minor REVISION</b> comments		
<b>Optional/General</b> comments		

### **PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
