PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Compulsory REVISION comments | | |
| Minor REVISION comments | <p>The paper presents brief survey on Holter monitoring device applications as well as contraindications. It covers a broad literature (from the year 1949 to 2021). To increase the readability/citations of the article, data representation in the form of pictures/graphs/tables may be included.</p> <p>The author(s) are advised to revisit the keywords section as the "Holter" keyword also appears in the article title. Therefore it can be dropped from the list of keywords.</p> <p>The used language is excellent, still minor grammatical corrections needs to be done e.g. page 2 line 5 (while the reference lists of the initially) may be reframed to come up with a meaningful sentence.</p> <p>The sentence (line 4 of abstract section) "many application and clinical advantages " appears in abstract and introduction section (paragraph 2) as it is. It is advised to make some changes in the sentence.</p> <p>In addition to the above recommendations there are several points which need to be addressed. The manuscript needs thorough self reading by the authors.</p> | |
