

Review Form 1.6

Journal Name:	Journal of Pharmaceutical Research International
Manuscript Number:	Ms_JPRI_81028
Title of the Manuscript:	Comparative evaluation & Correlation of severity of Temporo-Mandibular joint Disorders and Airway Difficulty in Class I and Class II vertical growth pattern cases.
Type of the Article	Study Protocol

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljpri.com/index.php/JPRI/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The theme of the article is interesting, however I don't know why the authors haven't referred to the diagnostic protocol for airway assessment included cephalometric methods of airway and adenoid evaluation commonly employed by ENT surgeons, such as: Handelman and Osborne, Maw et al, Holmberg and Linder-Aronson method and McNamara airway analysis?	
Minor REVISION comments	The "Research question: Whether there exists a co-relation between severity of TMD and degree of Airway/Breathing difficulty in Class two (II) vertical growth pattern cases as compared to Class one (I) cases???" is illogic as the Class II Vertical Growth Pattern includes many contradictories, as a terminology!!	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
