PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>1. The Title with word 'analysis' needs to be changed. An analysis involves rigorous scientific procedures (Including Statistical Analysis), which this study does not partake. It is better to use 'A study on...', instead of using 'analysis' in its title.</p> <p>2. In conclusion, mention has been made that 'Causes of underutilization,..... will be revealed and necessary improvement measures will be recommended'. But in study design, no related variables were found to serve this purpose. Presumably, this study is to find 'hospital utilization rates' through four parameters. This paragraph needs reframing and omit those words which are not pertinent to this study.</p> <p>Please See the Attachment</p>	
Minor REVISION comments	<p>1. Some sentences need reframing for clarity of understanding.</p>	
Optional/General comments	<p>It would have been a good study, if some variables were taken to determine the contributing factors affecting utilization of healthcare services in that particular hospital</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
