PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none">1. The study as a whole needs a major grammatic, formatting and scientific review. There are paragraphs of the introduction and discussion without citations and with informal writing. I suggest some orientation from the most graduate author about the correct scientific writing and consequent reformulation of these paragraphs. The authors can use the "Pathophysiology" discussion topic paragraphs as a model.2. Also, the material and methods topic needs more information. I'm lacking a better description of the steps to reach the studies included in the review (inclusion and exclusion criterias for example).3. There should not be blogspot citations since they are not scientific material.4. Standardize the reference list according to the guideline for authors.
