PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Dear editor, the article has some serious flaws. I recommend the following modification.</p> <ul style="list-style-type: none">- Methodology chapter is not described. The authors should give more details about the period that was investigated. It is confusing. Also the databases that were used for the investigation.- Double check the English. The article has serious language problems.- The name of the bacteria should be written using the italic format.- The abbreviations should be inserted in the text, when are used for the first time. The abbreviation AMR is used for 3 different terms (AMR resistance, opposition, and obstruction). It is confusing.- Please recheck the References order and format. <p>Best regards!</p>	
Minor REVISION comments		
Optional/General comments
