PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The abstract does not mention about the surgical management of esophageal rupture. The last sentence in abstract- "Although the perforation can occur at any site of the esophagus, there is a tendency to at main areas that correspond to natural points of narrowing of the lumen". Mackler's triad consists only of vomiting, chest discomfort and subcutaneous emphysema. Neck pain and stiffness are not noted.	
Minor REVISION comments	To maintain proper flow of the topic, the repair of thoracic esophageal rupture must be mentioned before abdominal esophageal rupture	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
