Compulsory REVISION comments		
Minor REVISION comments	The author gave the title: ' Comparative Study Of Safety And Efficacy Of Three Different Doses Of Fentanyl On Hemodynamic Response To Laryngoscopy And Tracheal Intubation In Patients Under General Anaesthesia ' and performed a complex study. There are necessary very small corrections and I marked them with red color in text (see the following pages: 1, 2, 4, 7 and 10). The paper is good. I think it is better to move the tables and the figures before "Conclusions" and "References". Every table must be discussed in few words/ one sentence. "References" must be positioned at the end of the paper.	
Optional/General comments
