PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The article completely lacks information about the list of medicines, their daily and course doses, as well as ways of administering drugs to the body of patients with type 2 diabetes mellitus. It cannot be that for 5 years of type 2 diabetes mellitus, complicated by coronary heart disease and hypertension, patients did not take sugar-lowering and other medications. In this regard, a thorough analysis of the pharmacotherapy performed in all the studied patients and a study of the relationship between the drugs used and the identified macro and microvascular complications is required.	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
