PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ol style="list-style-type: none">1. The authors are required to check the IUPAC names of the drugs as mentioned in the highlighted manuscript; IUPAC name is a one-word name with no spacing. Moreover the <i>R</i> and <i>S</i> in IUPAC names must be italicized.2. The rationale of study needs to be rephrased in terms of sentence formation. The work is really good, however, good narration can make it more attractive and understandable.3. I would suggest the authors to write the experimental part in past tense for continuity.4. The references need attention. The referencing style is not uniform. It should be in one style. There is also problem in numbering, kindly check carefully.	
Minor REVISION comments	At few places, spaces are missing between two words, the authors should check the manuscript carefully for these minor typographic errors.	
General comments	The authors are requested to see the Highlighted parts of manuscript with reviewer comments
