PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This methodology is intricately designed and performed. The quality of English is poor with lots of grammatical errors and needs a native speaker. Conclusion should be more specific. The rationale of results should be discussed properly and deeply in discussion section. Some more latest references on diabetes status, latest antidiabetic research related to natural plants and its extracts as well as its in vitro and in silico modelling should be discussed and cited in the introduction and discussion section. Some relevant references like Bharti et al., 2018 (doi: 10.1177/2042018818755019) should be cited in the manuscript	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
