PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Osteoarthritis is a topic of great relevance and its treatment is always discussed. The use of diarecein topic to overcome the drawbacks associated with oral administration of Diacerein is very interesting. It is important to emphasize that there is no study proving the long-term benefit of medication for osteoarthritis. There is no problem with the methodology. it will be interesting if a comparative clinical study is done (topical diacerein versus oral diacerin) and to compare the functional clinical results and complications	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
