PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The rate of incidence and mortality is significantly different, due to population characteristics, I.E: nationality, race, and social characteristics like income, besides the etiology of the disease. I counseling the authors to focus and describe the rate of incidence and mortality of a specific population. I.E: South African population.	
Minor REVISION comments	I advise the authors to specify to which of the two classes the Sida Acuta antioxidant components belong. Primary or secondary?	
Optional/General comments	Congratulations to the authors for the good work in an emerging and necessary field.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
