

## Review Form 1.6

Journal Name:	<a href="#">Journal of Pharmaceutical Research International</a>
Manuscript Number:	Ms_ JPRI _81664
Title of the Manuscript:	Gene expression analysis of specific genes related to genomic stability in colon cancer cell lines - a resource for cancer research
Type of the Article	

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljamr.com/index.php/JAMMR/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	This manuscript does an excellent job demonstrating significant expressions of nine genes in the colon cancer cell lines (HT-29, HCT-116 and SW-620). This research work is a good informer for all the oncologists for their cell lines of interest. I believe this is a reasonable hypothesis. Other thing that I liked about this manuscript is the pictorial representations of the results which gives clarity towards the conclusive results.	
<b>Minor</b> REVISION comments	The authors can add an RT-PCR amplication plot to the figure sections.	
<b>Optional/General</b> comments	I recommend that this paper be accepted.	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
