PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The author did a correlation study between the lipid profile and Vitamin B 12 levels in women having Gestational Diabetes Mellitus.</p> <p>Eventhough the author did with a small number of samples, it gives enormous knowledge to the medical community to assess vit B12 level also along with lipid profile, which is to be appreciated.</p> <p>In the methodology, the author says that the normal value of triglyceride as TAGs ≥ 150.</p> <p>But in the table 1, the triglyceride values of control group is 497.2 ± 23.5. The author needs to explain why he/she got that value for the control groups.</p>	
Minor REVISION comments	<p>"Vitamin B12 deficiency was defined as cited.⁷" may be explained in this manuscript itself, because the readers need to refer the reference 7.</p> <p>Many minor grammatical corrections are there. It is mentioned in the reviewed manuscript itself.</p>	
Optional/General comments
