PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The paper is nicely written but it is lack of supportive documents. There is no table attached depicting the case study report which reflects lack of data authenticity. The place, when and how of data collection is not mentioned and also to carry out the study whether permission was taken or not; that is even lacking. More number of references should be considered. The references from reputed journal sites will also add to the quality of the paper.	
Minor REVISION comments	The data must be properly collected and compiled. All the details must be supported with the confirmative data from the hospital where the study was done and those should be signed by an authorised person of the concerned hospital.	
Optional/General comments	Please do the grammatical spelling check by using software and also the sentences must be written in a writing format unlike the speaking pattern.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
