Manuscript Number:	Ms_JPRI_81927
Title of the Manuscript:	PROSPECTIVE CROSS-SECTIONAL STUDY OF INTRAUTERINE INSEMINATION WITH HYDROTUBATION IN WOMEN WITH INFERTILITY
Type of the Article	Original Research Article

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

<https://www.journaljpri.com/index.php/JPRI/editorial-policy>

### **PART 1:** Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	First of all, I congratulate the efforts of the authors as it is designed as a prospective study. Although the discussion and conclusion sections of the article are well written, there are serious typos and non-fluent language use in the introduction, material, method and results section. All the parameters are written as mean±SD which made me to think that the data were homogenous. Therefore please add a proof which shows the homogenous distribution of the data. In addition, the authors should add the limitations of the study. Although a statistically significant result was not obtained and the number of parameters examined was low in this study, I think that this study is a useful study in terms of being an example for future studies.	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments		

### **PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
