PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	English articles, grammar, pronouns, syntax etc No conclusions drawn from each cited reference. Information given too meagre to form an opinion Authors have not concluded anything about the prevalence of anxiety, focus is more on depression, except in one study sipahi et al, where every possible scale is used With such scanty coverage one cannot call this a worldwide view	
Minor REVISION comments		
Optional/General comments	Do not understand why this article is given for publication. It is written more like a book chapter with footnotes Author needs to summarise and conclude about anxiety and depression. Only then can they advocate psychological review before surgery. Even that is not a new finding.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
