Compulsory REVISION comments	<p>My opinion on this article is positive. Very interesting article. Methodologically it seems excellently planned and done. I am of the opinion that it can be published with minor corrections.</p> <p>My suggestions are:</p> <ul style="list-style-type: none">- Correct the numbers that mark the chapters. Chapter No. 3 has two chapters, in the chapter "3 Methodology" there are subchapters 2.3 and 2.4 and after that there is again the chapter "3 Result and Discussion".- I think the authors should write a little more discussion. Maybe it would be good to make a special chapter "discussion".- In Table 1, it is not clear to me whether isolate 2 is one of those with antimicrobial activity. It seems like it counts and I don't understand why.
